Experience:

Senior full-stack developer at Upwork

Sep 2018 - present

* Worked on a frontend development of an NFT marketplace, using React, NextJS and GraphQL

* Built a UI component library and storybook using ReactJS

* Worked as a frontend-focused full-stack developer on a Defi system development, leading the frontend team and helping the project manager with tokenomics and governance token business logic

* Developed a JavaScript library for conversion between S2 geometry system and geographic coordinate system as a solution to a VR/AR gamified tour service

* Worked as a lead developer for a RV rental SaaS platform, having structured the whole system and database and contributing to the REST API development

* Worked as a frontend developer for a tour cloud system development

* Worked as a full-stack developer for a marketing service company, developing 2 marketing services and implementing subscription management system

* Achieved 94% of JSS (Job success score) and top plus developer badge

Lead developer at YKLM Auctions

Nov 2019 - Aug 2021

* Directly worked with CTO or project manager to discuss the project roadmap and timeline

* Developed an online auction platform using Laravel and VueJS

* Integrated Mozilla Hubs into the gallery view of the mobile app

* Oversaw a team of 4 to write scalable code and clear documentation

* Managed unit testing and UI testing for new features, bugs and operating speed

* Handled all the DevOps and cloud services to launch and run MVP for couple of months

https://www.linkedin.com/in/kevin-le-4ba1a019b/   https://github.com/kevinlin-crypto

        * Managed all bug reports and customer feedbacks, and completed first round
          of system upgrade

    Senior full-stack developer at Toptal

        Aug 2018 - Oct 2019

            * Contributed to the in-house UI library to create reusable components in
              ReactJS

            * Created a MVP version of a logo maker online service using Laravel, VueJS
              and MongoDB

            * Implemented an online payment system and a subscription and membership
              management system for a media company to improve the customer conversion
              rate

            * Diagnosed technical issues for different companies and assisted them
              solving issues

            * Worked within an agile scrum team, contributing to 100% CICD and frontend
              development

    Mid-senior full-stack developer at AriensCo

        Aug 2015 - May 2017

            * Upgraded the company legacy system

            * Worked on the company internal employee management system

            * Set up the company payroll management portal

            * Developed, tested, debugged and documented the company task management and
              chat system

            * Developed dynamic and customizable company notification email system

            * Worked with PM, QA and customer support to figure out bugs and customer
              feedbacks from production environment

    Junior frontend developer at ROLZO

        May 2013 - Jul 2015

            * Assigned to e-commerce team, and participated in designing improved
              software and customer platform using algorithms to match users to product

            * Presented software development and lifecycle reports to CTO and CEO with 2
              other senior developers, receiving recognition for ideas and
              implementation

            * Migrated the frontend application from ordinary blade template to ReactJS

            * Developed mobile first responsive frontend app for customer and seller
              portal, closely working with the designer
